Art Unit: 1652

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1-25, 32, 33-58 and 62-82 drawn to a chimeric protein comprising amadoriase, a kit comprising said protein and its method of use, classified in class 435, subclass 189.
- II. Claim 26-31, drawn to DNA encoding amadorase of group I and related subject matter, classified in class 435, subclass 189.

The inventions are distinct, each from the other because:

Inventions of group I and II are independent chemical entities having different biological function. The search required for both groups overlapping, but not coextensive. Searching of group II requires searching class 536/23.2 or 435/252.3, which is not necessary for group I.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
